

SHIVANI PAL

Aspiring Business Analyst | Requirements Gathering & Process Improvement

Ghaziabad, Uttar Pradesh | shivanipal8630@gmail.com | +91-9717967276

PROFESSIONAL SUMMARY

Aspiring Business Analyst with professional experience in Customer Operations, Technical Support, and Data Analysis. Skilled in SQL, Python, Excel, API Integration, and business reporting. Experienced in analysing customer issues, identifying process gaps, documenting requirements, and supporting data-driven decision-making. Strong ability to bridge business needs and technical solutions through analytical thinking, stakeholder communication, and problem-solving. Seeking Business Analyst opportunities where I can contribute to process improvement and business growth.

CORE SKILLS

Business Analysis: Requirement Gathering, Gap Analysis, Process Mapping, User Stories, BRD/FRD Documentation, Stakeholder Management, Data-Driven Decision Making

Technical: API Integration, JSON Handling, Reporting Automation, CRM Tools

Customer & Soft Skills: Customer Empathy, Problem Solving, Stakeholder Communication, Cross-Team Collaboration, Customer Retention Strategy

Data & Analytics: SQL (MySQL, Oracle), Python (Pandas, NumPy), Excel (Pivot Tables, Dashboards, VLOOKUP)

PROFESSIONAL EXPERIENCE

Technical Support Specialist | [Astrobase](#)

Dec 2025 – present

- Handled end-to-end technical support for customers facing issues with their subscription plans on an ecommerce platform
- Identified and escalated recurring product issues related to plan management, payment failures, and account errors
- Analysed patterns in customer complaints to surface product pain points and reported findings to internal teams
- Used CRM tools to log, track, and resolve customer interactions with accurate documentation
- Consistently met retention and resolution KPIs through proactive follow-ups and timely query resolution
- Coordinated with internal teams to resolve complex technical issues that could not be solved at the first point of contact.

Technical Support Specialist | [Adobe Process-TP](#)

June 2025 – Nov 2025

- Managed end-to-end customer retention for an astrology platform, identifying at-risk users and implementing solutions to reduce churn
- Provided technical support to users facing product issues, diagnosing problems and coordinating with internal teams for resolution
- Used CRM tools to track customer interactions, monitor satisfaction scores, and maintain detailed case documentation
- Analysed patterns in customer complaints to identify recurring product pain points and reported findings to the team — directly informing product improvement decisions

- Executed SQL queries for data extraction, validation, and business reporting across multiple datasets
- Built interactive Excel dashboards that translated raw data into actionable business insights for stakeholders
- Reducing reporting time by 30%Automated repetitive reporting workflows using Python (Pandas),
- Processed and loaded API responses into structured data formats including DataFrames for further analysis
- Identified data anomalies and flagged inconsistencies proactively — demonstrating product-quality thinking

PROJECTS

Gathered reporting requirements and transformed business needs into automated reporting solutions.
Used Python, SQL, and Excel to automate data extraction and reporting workflows.
Built dashboards to support business decision-making and improve operational visibility.
Reduced manual reporting effort by approximately 30%

BUSINESS ANALYSIS PROJECTS

Customer Ticket Management System

- Prepared Business Requirement Document (BRD) including scope, stakeholders, requirements, and use cases.
- Defined functional and non-functional requirements.
- Created process flows, context diagrams, and user role definitions.
